

Satellite radio is one of the most refreshing new broadcast developments in many years. Satellite radio provides variety and quality that are not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. Please reject NAB's petition 04-160. Instead I hope that you strongly support satellite radio's ability to provide the programming that has made it stand out as a new technological achievement. Thank you for your thoughtful consideration.
